# Informações

**IMPORTANTE:**
Antes do assentamento verifique se a referência, tamanho, tonalidade e qualidade do produto coincidem em todas as caixas e também se correspondem ao que está especificado no documento referente à compra.

**RECLAMAÇÕES:**
Observe se o produto apresenta algum defeito visual. Caso você encontre, entre em contato com a TROPICAL STONES antes do assentamento. A instalação do produto significa a sua total aceitação.

**CUIDADOS:**
A areia pode provocar riscos em qualquer tipo de revestimento: pedra, madeira, vinil ou revestimentos vítreos. Por esse motivo, não oferecemos garantias contra riscos, principalmente em produtos com superfície brilhante. Recomendamos cuidados especiais durante o assentamento, limpeza e utilização.

**INDICAÇÕES PARA ASSENTAMENTO:**
- Antes do assentamento sugerimos que se monte um painel utilizando peças de diversas caixas, de maneira a verificar se o efeito estético é de fato o esperado.
- Para o assentamento das pastilhas de vidro em pisos e paredes, interno ou externo, em ambientes como: fachadas, piscinas, saunas e similares. Recomendamos utilizar argamassa de assentamento e rejuntes flexíveis que estejam em conformidade com a norma ABNT NBR14992.
- As reclamações e dúvidas deverão ser comunicadas a TROPICAL STONES antes do assentamento do produto.
- As próprias características do material proporcionam variações de tonalidades em lotes diferentes.
- Recomendamos agregar no momento da compra das pastilhas pelo menos 5% a mais da área aplicada.
- As placas devem ser assentadas segundo o nivelamento, mantendo entre si, a mesma largura da junta já existente na própria placa.

**PREPARAÇÃO DO LOCAL:**
Verificar a resistência da base (contra piso e/ou reboco), ausência de partes ocas, fissuras e / ou rachaduras. Verificar a presença de substâncias que impeçam a aderência das pastilhas, tais como gordura, tinta, óleo ou poeira. Em bases com alta incidência de luz solar e/ou ventilação intensa, umedecer o local antes da aplicação.

**APLICAÇÕES:**
A superfície deverá estar bem nivelada e limpa. Aplique argamassa usando escariadeira de dentes, espalhando de forma uniforme. Assente as placas de pastilhas TROPICAL STONES pressionando-as com um taco de madeira aparelhada ou desempenadeira de madeira para que as pastilhas fiquem niveladas e preencham os espaços das juntas. Remover o excesso de argamassa com a esponja dando acabamento nas juntas.

**LIMPEZA:**
- As pastilhas TROPICAL STONES como qualquer outro revestimento terá seu aspecto estético garantido se houver uma limpeza regular, ou seja, limpeza diária com água e detergente neutro.
- Recomenda-se a utilização de produtos próprios para a limpeza de pastilha que contenham em sua formulação tenso ativos não iônicos e ácidos especiais.
- Não utilizar produtos que em sua composição contenham ácidos fortes como: ácido clorídrico, ácido sulfúrico e ácido fluorídrico na limpeza, pois podem danificar a pastilha, bem como o rejunte.
